EDUCATION

University of Arkansas	Bachelor of Engineering, Industrial Engineering & Operations Analytics	May 2029
		GPA:3.54/4.00

PROFESSIONAL EXPERIENCE

HotTakes — Business Development Associate, Remote Jan 2026 — Mar 2026

- Generated 100+ customer sign-ups by promoting sports betting partnerships through targeted digital outreach campaigns.
- Expanded customer engagement by connecting with 50–75 prospective users weekly across social media platforms.
- Maintained accurate CRM records while tracking lead activity, customer conversions, and outreach performance metrics.
- Collaborated with a 10+ member sales team to achieve weekly growth and acquisition objectives.

Ultimate Water — Salesperson, Cypress, TX Jun 2025 — Aug 2025

- Generated \$12,000+ monthly revenue by selling water treatment systems to 20–25 customers per month.
- Expanded customer base by 30% through door-to-door outreach and referral-driven lead generation efforts.
- Closed 40% of qualified leads through product demonstrations and customized pricing recommendations for homeowners.
- Exceeded monthly sales targets by 15–20% through consistent follow-up using CRM software tools.

ENGINEERING PROJECTS

Campus Energy Systems Optimization — University of Arkansas, Fayetteville, AR Jan 2026 — Apr 2026

- Analyzed campus energy consumption to identify opportunities for improving efficiency through data collection and analysis.
- Researched energy generation, transmission, and smart-grid technologies to develop sustainable engineering recommendations.
- Designed a Microsoft Forms survey to evaluate student energy habits and support engineering decisions.
- Presented engineering solutions using smart lighting, HVAC automation, and occupancy sensors to reduce energy waste.

Water Filtration Process Optimization — University of Arkansas, Fayetteville, AR Sep 2025 — Dec 2025

- Optimized water filtration processes by evaluating system performance and identifying opportunities to improve efficiency.
- Analyzed filtration data to recommend process improvements that enhanced operational effectiveness and system reliability.
- Collaborated with team members to develop engineering solutions meeting project objectives and performance requirements.
- Presented process optimization recommendations supported by data analysis, testing results, and engineering design principles.

ENGINEERING & LEADERSHIP EXPERIENCE

Institute of Industrial and Systems Engineers (IISE) Member, Fayetteville, AR Mar 2026 — Present

- Participate in networking events connecting students with industry professionals, alumni, and recruiters nationwide.
- Engage with faculty and guest speakers to explore industrial engineering careers and professional opportunities.
- Attend professional development workshops focused on leadership growth, career readiness, and industry best practices.
- Collaborate with fellow engineering students to expand professional networks and explore diverse career pathways.

KESEM — Development Coordinator, Fayetteville, AR Nov 2025 — Present

- Coordinate fundraising initiatives supporting children impacted by a parent's cancer through chapter-wide campaigns.
- Secure donations and sponsorships by building relationships with local businesses and community partners.
- Increase donor engagement through outreach efforts, fundraising events, and personalized supporter communications.
- Collaborate with a 15+ member leadership team to achieve annual fundraising and chapter development goals.

NASA Aerospace Scholars — Student Associate, Remote Oct 2023 — Apr 2024

- Selected as 1 of approximately 300 students nationwide to participate in a competitive 5-month NASA aerospace program.
- Modeled mission feasibility constraints using over 200 lines of Python code for performance and system tradeoff analysis.
- Engineered a conceptual Mars exploration mission architecture including 10+ subsystems and defined project timelines.
- Collaborated remotely with a 5–7-member engineering team to deliver 3 technical presentations and 1 final written report.

AWARDS & SKILLS

Computer Skills: Microsoft Office 365, Python, Java, RStudio
Certifications: Financial Markets — Yale University, Microsoft Excel
Languages: English (Fluent), Spanish (Basic)
